SUMMARY

Software developer and technical support specialist with a foundation in front-end development and customer-focused troubleshooting. Currently supporting 19,000+ schools and districts at Edlio, resolving complex platform issues and customizing site designs with CSS. Built full-stack applications with JavaScript, Node.js, and React through Worcester State University's web development program, and brings sharp analytical and communication skills from prior careers in finance, table games, and customer service.

TECHNICAL SKILLS

Front End	HTML5, CSS3, JavaScript, React, Bootstrap, Foundation, Semantic UI, Material UI
Back End	Node.js, Express.js, RESTful APIs, SQL
Databases	MySQL, MongoDB, Sequelize
Testing	Jest, Mocha, Chai, Enzyme, Test-Driven Development (TDD)
Tools	Git, GitHub, GitLab, npm, Azure, Balsamiq

EXPERIENCE

Edlio
Jun 2022 – Present

Technical Support Specialist · Remote

- Provide technical support to 19,000+ schools and districts nationwide, maintaining high customer satisfaction across a large, varied client base.
- Resolve 75+ support tickets per week covering site functionality, user access, and platform configuration.
- Diagnose and troubleshoot complex technical issues, communicating clear next steps to non-technical school staff.
- Customize client websites with CSS to match district branding and improve site appearance.

Stack Education
Oct 2021 – Jul 2022

Technical Coach · Remote

- Mentored a cohort of 8 students through a 20-week web development and software engineering boot camp.
- Identified each student's learning gaps and coached them through JavaScript, Node.js, MySQL, and React.
- Graded weekly assignments and three portfolio projects, delivering detailed technical feedback.

OAF / Delaget
Oct 2021 – Dec 2021

Software Engineering Intern · Remote

- Designed and built a customer search query tool in React and Semantic UI React, wireframing the interface in Balsamiq.
- Translated project requirements into working features to deliver the completed application.

PROJECTS

Restaurant Data Search React · Semantic UI React · CSS · Azure

React app that filters restaurant data by multiple metrics, with AND/OR logic to match all criteria or any of them.

Cocktail Finder Node.js · JavaScript · HTML · CSS · Bootstrap — Live Demo ↗

Searchable cocktail app that queries a third-party API by drink name and returns ingredients and preparation steps.

React To-Do App React · React Bootstrap · Material UI · Local Storage

Task manager that saves to-dos in the browser so they persist between sessions, with one-click task removal.

EDUCATION

Worcester State University · Certificate in Web Development
Sep 2020 – Feb 2021

- 20-week, practitioner-led intensive in JavaScript, Node.js, React, HTML, CSS, and SQL, covering the full cycle from UX design through deployment, including a client project with a tech startup.
